

Website Maintenance & Support Scope

For AMET University Website — content updates, technical support, hosting, backups, server & backend management.

This document outlines the proposed scope for maintaining and supporting the AMET University website. The engagement covers routine content updates, new content publishing, creation of new pages or sections, file hosting, backup management, server and backend management, technical monitoring, and timely support for website-related requirements.

1. Scope of Website Maintenance

Content Updates

- Update text, images, banners, announcements, notices, circulars, and contact details.
- Upload and link PDFs such as exam notices, timetables, results, forms, prospectus, and policy documents.
- Update department, admission, placement, governance, and student-corner content.
- Correct spelling, formatting, layout alignment, and broken content issues.

Existing Site Edits

- Edit existing pages, menus, cards, tables, accordions, sliders, and footer/header information.
- Replace outdated content with approved new content.
- Maintain consistent styling, brand colors, responsive layout, and link behavior.
- Improve usability and presentation of existing sections where required.

New Page / Section Creation

- Create new pages for departments, events, announcements, statutory disclosures, courses, or initiatives.
- Create landing sections, galleries, document lists, profile pages, and structured content blocks.
- Add navigation links and ensure pages work across desktop and mobile devices.
- Follow the approved website design system and content hierarchy.

Document & Media Management

- Organize files in website document folders with meaningful names.
- Ensure PDF links open correctly and downloadable documents work as expected.
- Compress and optimize images where needed for faster loading.
- Replace obsolete files and maintain clean document references.

2. Hosting & File Management

- Host and manage the website files on the agreed hosting environment.
- Manage domain configuration, DNS records, SSL certificates, and renewals.
- Upload, organize, and maintain documents, images, videos, and media assets.
- Maintain a clean folder structure for departments, notices, results, and disclosures.
- Monitor storage usage and recommend upgrades when required.

- Manage email forwarding/aliases related to the website where applicable.

3. Backup Management

- Maintain regular backups of website files, documents, and database (where applicable).
- Store backups securely with versioning so previous states can be restored.
- Perform periodic restore tests to ensure backup integrity.
- Recover and restore website or specific files in case of accidental deletion or failure.
- Maintain a documented backup and recovery schedule.

4. Server & Backend Management

- Manage the hosting server, deployments, and environment configuration.
- Monitor server uptime, resource usage (CPU, memory, bandwidth, storage), and respond to alerts.
- Apply security patches, OS/runtime updates, and dependency upgrades safely.
- Manage backend services, APIs, environment variables, and access credentials securely.
- Configure and maintain redirects, caching, CDN, and performance optimizations.
- Troubleshoot server-side errors, downtime, and deployment issues.
- Maintain SSL/TLS, firewall rules, and basic security hardening.

5. Technical Support & Monitoring

- Check and fix broken links, missing pages, incorrect redirects, and display issues.
- Resolve layout problems on desktop, tablet, and mobile views.
- Monitor website performance and recommend improvements for speed and user experience.
- Review dependency or front-end issues and apply safe updates when needed.
- Support publishing and deployment of approved website changes.

6. SEO, Analytics & Compliance Support

- Update page titles, meta descriptions, headings, and structured content where applicable.
- Maintain clean internal linking and search-friendly page structure.
- Support analytics and tracking (e.g. GA/GTM) updates when requested.
- Ensure statutory and mandatory disclosure pages remain organized and accessible.

7. Request Handling Process

Step	Process
1	Client shares approved content, documents, images, and instructions by email or agreed channel.
2	Support team reviews the request, confirms scope, and estimates effort or timeline if required.
3	Changes are implemented on the website and checked for layout, links, and responsiveness.
4	Client reviews the update and shares feedback, if any.
5	Final corrections are completed and the update is considered closed.

8. Priority & Response Targets

Priority	Examples	Target Response	Target Resolution
Critical	Website down, server outage, major broken page, urgent admission/exam issue	2–4 business hours	Same day / earliest possible
High	Important announcement, incorrect critical content, broken key link	1 business day	1–2 business days
Medium	Page edits, PDF uploads, profile/content updates	1–2 business days	2–4 business days
Low	Minor formatting, future-dated updates, general improvements	2 business days	As per agreed schedule

9. Items Included

- Routine website content maintenance and updates.
- Creation of new pages or sections using existing website design patterns.
- Uploading and linking approved documents and media.
- File hosting, document organization, and media management.
- Backup creation, storage, and restoration support.
- Server, hosting, and backend maintenance and monitoring.
- Basic SEO/meta updates for edited or newly created pages.
- Responsive checks for updated pages.
- Bug fixing related to website display, navigation, and links.

10. Items Outside Standard Scope

- Major redesign of the entire website or brand identity.
- Large custom software modules, portals, payment systems, or backend applications unless separately scoped.
- Content writing, translation, photography, video production, or data entry at large scale unless agreed.
- Third-party service charges, hosting/domain costs, paid plugins, paid APIs, or license fees (billed at actuals).
- Emergency work outside agreed support hours unless specifically approved.

Note: Final pricing, monthly hours, support timings, and turnaround commitments can be confirmed after reviewing the expected monthly update volume, hosting requirements, and urgency expectations.
