

DEPARTMENT OF MARINE BIOTECHNOLOGY

BEST PRACTICES

1. **Visiting Student Project Scheme:** Students from other institutions are given opportunity with Faculty Guidance, Research Infrastructure and Consumables to undertake their mini projects, summer projects, final year projects and short term trainings.
2. **Research focused teaching methodology:** The practical courses of M.Sc., Marine Biotechnology are given as components of mini projects so that the student learns the experiments as per curriculum and in addition to that get research exposure and publications. On an average, a PG student gets at least two publications at the time of completion of his programme. This helps them to get admission in Ph.D. programmes both in India and abroad.
3. **Regreen Chennai:** Department involved in developing a nursery to tree plant saplings free of cost to a civic society movement known as Regreen Chennai for enhancing green cover in Chennai that was lost during 2016 Vardhah Cyclone.
4. **Wealth from Waste 1:** Department converts paper wastes into artistic handmade papers.
5. **Wealth from Waste 2:** Department takes steps in converting uncooked food wastes from canteen into valued added product, Vermicompost.
6. **Wealth from Waste3:** Department is producing Fish Amino Acids, an organic plant growth promoter from fish processing waste.
