MESSAGE FROM THE PRINCIPAL

The Department of Nautical Science at AMET UNIVERSITY was established in 2007 to meet the international demand for certified and educated manpower in the field of Nautical science. This Department offers a bachelor's degree in nautical science. The fundamentals of shipboard management, navigation, collision avoidance, cargo handling, and a few aspects of maritime technology are taught. Students are encouraged to take on challenging projects and participating extracurricular activities for their overall development. The goal is to develop good trainee Nautical Officer cadets as strong capacity for accepting challenges and shouldering the responsibilities as they arise. We value our industries, Institutions, relationship with alumni, and well-wishers at AMET University.

I applaud the group for taking the initiative to create this magazine. I am pleased to announce that our Nautical Science department is releasing a magazine this academic year. It's a great opportunity

for academics to hone their talents. I am convinced that it would be a fantastic means for the rest of the world to learn about AMET's potential and accomplishments. I am hoping that the magazine will bring out everyone's hidden talent. I join others in praising and honoring the editors and magazine together, and wishing them

success in their undertaking. It creates a lively environ committee's efforts in putting the management in which students and faculty members can demonstrate their intellectual ability.

PREAMBLE

Overlooking the deep blue sea cradled by the Bay of Bengal and tucked in the scenic driveway of east coast road is AMET. Only University from India to be a member of the International Association of Maritime Universities. With quality, commitment, knowledge and excellence as its cornerstones, AMET had a humble beginning in the year 1993 with just 14 cadets moulded for a career in merchant navy through a Higher National Diploma programme in marine engineering AMET's uncompromising strides of excellence in the field of maritime education and training laced with its capacity to feed the global shipping industry with an unrivalled maritime human resource secured it the status of becoming the first Deemed to be University in India for maritime education, training, research and development activities on the 21st August 2007.

AMET had the privilege and unprecedented status of getting unveiled as a Maritime Deemed to be University from the hands of the secretary-general of the International Maritime Organization, Mr. Efthimios E Mitropoulos. AMET serves as an ocean of knowledge for 4000 students pursuing Programs ranging from diploma to Doctoral programs through 9 schools and 23 intensive research and training centers for marine and marine related and Training centers for marine and marine related activities.

Equipped with an excellent infrastructure for research and development, co-curricular and extracurricular activities AMET secured its compliance certificate for ISO 9001:2015 QMS standards from the prestigious and globally renowned DET NORSKE VERITAS, Norway.

Forged with a vision to secure a position of prominence among the world's maritime universities and with a mission to be the fountainhead for nurturing the finest intellectual capital base for the maritime sector - worldwide, education at AMET caters to the comprehensive development of all its students to make them better educated, more articulate and demanding. To that end is enabled and inculcated by modern teaching aids, well-equipped workshops for practical training, a marine workshop for hands-on training on marine auxiliaries, Ship in Campus, well-furnished hostel, canteen facilities, indoor and outdoor games, swimming pool, medical facilities backed by an overall conducive learning environment.

For over two decades AMET is remaining the favourite destination for campus interviews by many shipping giants such as AP MOLLER MAERSK, GOODWOOD, NYK, SONANGOL, VSHIPS,

THOME, SHELL, CHEVRON, STENA and so goes a list of over 100 companies. Besides positions on board, AMET Business School graduates have secured lucrative jobs in commercial shipping sectors such as chartering and shipbroking. Nevertheless, Naval architecture, petroleum engineering, harbour engineering, marine electrical and electronics engineering graduates have successfully walked away from AMET with jobs offering sumptuous packages along with an opportunity to grow and glow in their career swiftly. Needless to say, the entrepreneurship development activities nurtured into AMETians has been found rewarding by students who are Chief Executive Officers of their organization.

AMET works closely and cohesively with the global shipping industry and aligns its objectives regularly to suit the demands of the evolution in technology. Such alignment keeps the students

updated and industry-ready. With a consistent placement record, AMET has been recognized as a premier institution for marine and marine-related jobs and has earned a position as a trustworthy consultant for research and development projects wherein the investment is worth to the tune of several crores of rupees. Adducing to these achievements are the awards and accolades garnered by AMET for a range of activities in pursuit of excellence over the last two decades in maritime education, training, research and development.

AMET commitment to cater to maritime capacity building has no bounds. AMET's stronghold as an institution for quality, discipline and rigour has drawn the attention of several growing maritime nations. To name a few are the 4 Republic of Nigeria, Angola and Djibouti have signed a long-term memorandum of understanding with AMET for developing their nation's maritime human resource in particular and maritime infrastructure in general, Nigerian Maritime safety authority (NIMASA) which is the supreme authority for maritime administration in Nigeria, has got over 500 cadets trained through AMET over the last five years. AMET is a host to over 400 international students hailing from more than 10 countries across the world, thus providing and proving itself as a culturally diverse destination with a pledge to "Respect Diversity" and to promote cross-cultural understanding which is the most essential quality for working in the global environment.

AMET has a very ambitious vision 2025 plan wherein it aims to be a one-stop solution for all marine-related activities happening around the world and has charted out an action plan to gauge its growth towards its 2025 milestone. The dogged perseverance of AMET's

unmatched faculty gears up the student to meet the challenges of their life and career with the tenacity of mind, endeavor to face them and emerge victoriously. With a synergistic attitude prevailing among management, staff and student, AMET is all set to achieve and sustain a status par excellence.

VISION AND MISSION OF THE UNIVERSITY

VISION

To sustain identity as a World Class Leader in Maritime Education and empower learners with wholesome knowledge through progressive innovation in training, research and development which will render students a unique learning experience and a transformation impact on the Global Society

MISSION

AMET will strive continuously to Impart value-based higher education and technical knowledge with uncompromising strides of outstanding quality.

Emerge as a Centre of Excellence inculcating skill development in recent technologies by industrial trends, create World-class research capabilities on par with the finest in the world and broaden student's horizons beyond classroom education.

Nurture talent and entrepreneurship to enable all-round personality development among students.

Empower students across socio-economic strata. Make a positive difference to society through technical education.

QUALITY POLICY

AMET is committed to provide the highest quality in education and be the most preferred institution for pursuing marine and marine related courses.

This will be achieved by a consistent focus on:

Providing a conducive, vibrant, progressive and enriching learning atmosphere.

Teaching Excellence and Research Output.

Global outlook and engaging with the world through learning, teaching and research.

Providing a competitive advantage in gaining employment for further academic opportunities.

Maintaining excellent links with commerce and industry both national and international.

Complying with all applicable requirements and continually improving the effectiveness of the Quality Management System.

Merchant Shipping Transport, even in these modern times of technological advancements is the only mode of transport that is still legally, statutorily and customarily given the status of "Maritime Adventure" by all the Maritime Countries. The persons operating the ships amidst the vagaries of the oceans need to be self-governing, motivated and with sharp ability to quickly take the right decisions of considerable commercial and safety implications. The capital value of a single ship along with its cargo is more than the combined capital value of a few Top-end factories including their

full production inventory whereas, in contrast, a ship is manned, operated and managed practically by as little as 20 men whilst more than a few thousand men operate and manage the factories ashore.

The Nautical Science Department under the School of Nautical Science, AMET University was established primarily to develop professionally competent graduate nautical officers with all round proficiency and dedication to the profession for the operation of merchant ships. The course not only provides the students the required theoretical knowledge base but also nurtures in them the innate ability to quickly and readily apply the theory into several challenging application areas that may come about in their later profession.

A career in the Merchant marine as a Nautical Officer can be a rewarding one, both financially and equally importantly in terms of job satisfaction. The required time span, after graduation, to rise to the level of Master will be around 8 years. The course not only prepares the students for the first two stages of their career as Navigating Officer- but the curriculum also provides them with sound knowledge base for higher levels of management as well. There are numerous senior-level shore based job opportunities which await the students if they in their career path choose to switch over from sailing to shore based Shipping sector.

HISTORY AND ESTABLISHMENT

The Department of Nautical Science was one of the two departments established in 1993 offering Higher National Diploma in nautical science in collaboration with Glasgow College of Nautical Science UK. From humble beginning catering to 13 students the department has today grown catering to about 500 BSc students plus about 150 Higher National Diploma Students in the span of last 20 years and offering various Pre-sea and Post Seacourses.

In the early 1990s Maritime Education in India was confined to Training Ship Chanakya and a handful of smaller Institutes offering short-term modular courses, typically of less than 2-weeks duration. More importantly the South Indian sector was a neglected sector with no Maritime education.

Institutes whereas there were considerable number of aspirants into the Merchant Navy profession who had to necessarily go North or West to pursue their core education. AMET, especially the Department of Nautical Science was the first Institution in SOUTH INDIA which ventured into Long term courses.

In the year 2000 the DG Shipping under the Ministry of Shipping and surface transport recognized the need to encourage Private Sector participation in Maritime Education. AMET was the foremost and first PRIVATE Institution to board on this opportunity to commence a 3 year degree program in Nautical Science in collaboration first with Alagappa University and later with BITS Ranchi University.

During these years the Nautical Science Department not only grew in size by way of more students but also gained experience in higher education. AMET sought to become a truly de-novo University under the able aegis of UGC in the year 2007. This transition marked a distinct change in the approach to Maritime Education, primarily the nautical Science. As a dedicated Maritime University the Department of Nautical Science was able to ably meet the changing demands of the stake holding Industry on the one hand and more importantly to progressively raise the pure science aspects of Maritime core subjects to a higher level.

This is borne out by the fact that ever since becoming a De-Novo University the Department has enhanced the syllabus standards more than 4 times in the last 5 years-balancing the areas of pure science and applied science suitably.

ABOUT THE DEPARTMENT

The Department of Nautical Science is one of the two departments established in 1993 offering Higher National Diploma in nautical science - in collaboration with Glasgow College of Nautical Science UK. From A humble beginning catering to 13 students the department has today grown extensively catering to over 900 cadets pursuing 3 year under graduate program in Nautical science approved by the Directorate General of Shipping, Govt. of India as well as cadets pursuing Advance Diploma in Nautical Science approved by the Maritime Coast Guard Agency (MCA), U.K. The strength of the department of nautical science is its faculty and infrastructure. The department is equipped with a team of highly experienced professionals who have a combination of sailing, industry and teaching experience. The department has a full mission ship simulator, Radar and ECDIS simulator, Wheel house, Seamanship laboratory, Container loading simulator and several softwares to provide the cadets hands on experience about ship board operations. AMET University has been awarded consistently with an "A1 Outstanding grade" for the last 8 years which is a testimonial of the department of Nautical science for its consistent performance

VISION

To keep the curriculum updated with the latest international and national requirements to meet the standards for training certification and watch keeping convention as amended

MISSION

To be a source of best practices that will deliver uncompromising technical competency and professional excellence.

To embrace emerging technologies in a seamless manner and integrate it progressively to our curriculum

MESSAGE FROM OUR COURSE INCHARGE

The Department of Nautical Science at AMET UNIVERSITY responds to the global demand for proficient maritime professionals. Offering a comprehensive Nautical Science Bachelor's program, the curriculum covers all nautical subjects includes shipboard management, precise navigation, and advanced maritime technology.

The primary goal of our department is to train successful navigating officer as a 'Seafarer' who is able to be competent, innovative and productive in addressing the needs of the Shipping Industry, Grow professionally with the knowledge and proficiency skills throughout the career. Acquire high standard of ethical conduct, safety culture, positive attitude, societal responsibilities to nurture and develop capable trainee Nautical Officer cadets who have the skills and capacity to accept and shoulder responsibilities when they arise.

Our students are actively encouraged to undertake challenging projects and participate in extracurricular activities, fostering holistic development. Our mission is to nurture capable Nautical Officer cadets prepared to handle challenges and responsibilities. At AMET University, we deeply value our partnerships with industries, institutions, alumni, and well-wishers, enriching our educational environment.

It is indeed a commendable initiative to introduce a magazine by the Nautical Science department, and it's an exciting opportunity for academics to showcase their talents. This magazine will serve as a platform to showcase AMET's potential and achievements to the world. The hope is that the magazine will uncover the hidden talents of everyone involved. The efforts of the editors and contributors to the magazine are deserving of praise and recognition, and I, along with others, wish them success in this endeavour.

NAVINAUTICS 2K23

Navinautics is one of the most interesting cultural events conducted among the marine Universities by the Department of Nautical Science at AMET University on the 9th and 10th March of 2023. Students from the various University participated actively in many events and won many prizes in events that tested their skills based on the seafarers' life. On 9th March the Navinautics 2K23 compendium was released by the honorable Chief Guest "Capt. Viswanathan Visweswaran" along with the presence of our honorable Vice Principal - DGS Courses "Capt. Gopal Srinivas". The cultural event went like a festival at AMET University and the faculties were also involved in the events. The event was a grand success and mind-blowing. The viewers were very thrilled while watching the energetic performance which gave them goosebumps.

The following events took place

- **Best Cadet**
- **Boat Rowing**
- **Celestial Navigation**
- **Fire fighting**
- **Morse Code**
- **Debate**
- **Seamanship Skills**
- **Tug of Oars**
- **Treasure Hunt**
- **Quizo Nautico**

MARITIME NEWS

CONTAINER SHIPS RUNS AGROUND IN HOOGLY

A 140-metre-long container vessel, MTT Singapore, ran aground in the Hooghly River at Pukuria Point near Garchumuk in West Bengal's Howrah district on Wednesday due to steering failure. The vessel carrying 338 containers from Port Kelang in Malaysia was bound for Netaji Subhash Dock under Kolkata Dock System.

The master of the vessel, Edwin Deen Ramas, and 20 crew members, all from the Philippines and Malaysia, are safe. The vessel got stuck at 11.30 am, the official said.

A pilot from Syama Prasad Mookerjee Port in Kolkata is on board the vessel and tugs from Kolkata and Haldia have been dispatched to pull it free. The process is expected to be completed by Wednesday night or early Thursday during high tide.

The master of the vessel has been advised to keep the containers properly to ensure that none of them falls into the water.

PANAMA FLAGGED TANKER CATCHES FIRE NEAR IRANIAN COAST

A Panama-flagged tanker called White Pearl has caught fire near Assaluyeh on Iran's Gulf coast, Iranian state media reported on Thursday, adding that all crew members were safe.

"Twenty-two of the ship's crew have been rescued by Iranian rescue teams after the ship's captain requested assistance from the port authorities," state TV quoted a local ports official as saying.

The official said that the tanker, carrying 40,000 tons of liquefied petroleum gas, had experienced "a problem in the engine room due to a fire."

KMTC CONTAINER SHIP SUFFERS FIRE OFF MALAYSIA

The 2778 Ton container ship KMTC Shenzhen experience a fire off port Klang in Malaysia on 12 August, according to the UK insurance company WK webster.

It was that at least three firefighting tugs were deployed to assist in the fire incident in conjunction with local fire brigade which was brought under control within two hours.

MARITIME LABORATORY

Ship Simulator:

Full mission 270 deg view for Navigation purpose capable of creating a system of actual Ship Navigation during darkness and poor visibility.

Bridge :

A full-fledged bridge and mast located high up with navigation equipment's in working order viz. Radar, GPS, Course Recorder, Echo Sounder, Steering.

Loadicator :

Provides information on the trim and list that the vessel will have in a particular stage of the stowage. Other than trim and list, we also ensure that shear forces and bending moments do not exceed the 25 safe limits

Seamanship Lab:

Fitted with 5000 sq. ft of working laboratory where all facilities available for Rope work, Boat work, Steering, projects, Rules of Road, Seamanship techniques, Boat Rowing.

ECDIS and ARPA Simulator :

It is the complete system for training & understanding the operation of an Electronic Chart And Display And Information System and working of RADAR can be used to demonstrate.

ALUMNI

Hello, everyone! I'm Surender, and I embarked on my maritime career in 2018 as a cadet at AMET University.

During my three years in college, AMET provided me with invaluable opportunities to sharpen my skills, nurture leadership qualities, and develop patience.

These essential skills paved the way for me to secure a placement at A.P. Moller Maersk. Currently, I am proudly serving as a Trainee Deck Officer at A.P. Moller Maersk, where I am actively accumulating knowledge and gaining practical experience to reach my goal of becoming a Deck Officer.

I extend my heartfelt thanks to the dedicated faculties at AMET University who played a pivotal role in molding me into the person I am today.

Hello, everyone! I am Guru Vaji Kannan and I lightened my career in 2018 at AMET university. AMET is well-equipped not only for education but also for an enriched campus life. Alongside your studies, you can enjoy various sports on the separate sports grounds, allowing you to stay active and refreshed.

The university also ensures comfortable and well-maintained accommodation facilities, with separate arrangements for both male and female students. This creates a nurturing environment where you can not only excel academically but also gain valuable sea experience and make the most of your college experience. I was happily placed at A. P. Moller Maersk and currently serving as a Trainee Deck Officer and successfully gaining the knowledge

POEM

Life at sea

A life of freedom, yet one that enslaves.

The ocean vast, a boundless plain,
Endless skies, no streets to gain.
A constant motion, a gentle sway,
As ships traverse both night and day.

The sunsets paint a vivid scene,
A canvas vast, forever serene.
But storms arise, with fury's might,
Challenging sailors through the night.

A brotherhood formed in salt and spray,
Facing challenges come what may.
United they stand, the crew at sea,
In this floating world, they find their glee.

Srikanth
BSc NS 21 (G8)

SEAFARER'S SEAMANSHIP

Amidst the vast and rolling sea,
Where horizon meets eternity,
A sailor's heart beats strong and true,
Bound by waves of ocean blue.

The ship, a vessel of dreams untold,
Guided by stars and tales of old,
Her crew, a band of brave and bold,
Through storm and calm, their stories unfold.

They hoist the sails, catch the wind,
With seasoned hands, the ropes they bind,
Navigating through each treacherous bend,
With courage and skill, their spirits ascend.

In moonlit nights, they hear the call,
Of sirens' songs, enchanting all,
Yet wisdom guides them safely past,
Avoiding fate's cruel grasp.

With every sunrise, a new day dawn,
A chance for adventure, a canvas to spawn,
The sea, a mistress, both fierce and kind,
Her mysteries, to seekers, she'll unwind.

In unity, they face the tide,
Facing fears that cannot hide,
A brotherhood forged through trials and glee,
Seamanship's bond, an eternal decree.

**Shashangan
BSc NS 21(G8)**

INTERVIEW WITH CAPTAIN

Cdt Srikanth: Good Morning Sir, I'm Cdt Srikanth from 2nd year B.Sc. Nautical Science. I hope you and your family are doing well. Sir I'm here to take an interview about your life in merchant navy.

Capt Rajesh: Thank you Srikanth. Yes, all are doing well.

Cdt Srikanth: Sir my first question is "What inspired you to join Merchant Navy?"

Capt Rajesh: My dad was in defence, He was in the Air Force, but I was fascinated by Indian Navy so I gave NDA exam. But unfortunately I could not clear the exam. Then I gave the exam in TS Rajendra which I successfully cleared. That is how I joined merchant navy.

Cdt Srikanth: "what was the toughest part of your journey in merchant navy?"

Capt Rajesh: The toughest part of this job for me was staying away from family, friends and home. My life went smooth in Merchant Navy. I was passionate throughout, so I found it interesting and intriguing. Clearing the exams was also one of the tough parts.

Cdt Srikanth: Sir, for how long did you sail? And in which companies?

Capt Rajesh: I sailed for 15 years and in the last eight years I sailed in fleet ship management chemical tanker fleet.

Cdt Srikanth: "How can any cadet improve their weakness in the Merchant Navy? Like homesickness?"

Capt Rajesh: The training for this starts from your maritime training institution. I also found first few months very tough, but when I spoke to my senior they told me, we will try to keep you busy so you don't think about home. After that I started reading novels, books and kept myself busy in studies. If you keep yourself busy with your hobbies and things you love to do, then you can overcome your homesickness

Cdt Srikanth: Sir according to you what is the best and the worst part of merchant navy?

Capt Rajesh: Best part is this profession. This profession is almost like defence. First of all is the uniform, you get a lot of respect in the society and also on board, a clear hierarchical system is set. When we mention that we're officers, people tend to respect us. When we become captain, the whole crew depends on us because our leadership is what feeds them. If you are not a good leader, the crew will also face a lot of trouble. The only worst part is staying away from family and friends.

Cdt Srikanth: Sir, can you tell me the difference in merchant navy before in your day and now?

Capt. Rajesh: In our time, the communication system was not so developed. So officers got a lot of autonomy, they could take independent decisions and later report to the company. Nowadays, because of development in communication, ships are in contact with the shore. So your activities are monitored and they also intervene in the work. Before they needed a more technical guy, but they now need crew who can manage administration too. You have to know what to report, when to report.

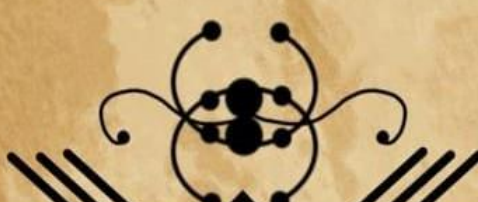

Cdt Srikanth: Sir after merchant navy, what inspired you to join teaching field?

Capt. Rajesh: After sailing, I was master for five years. And I was sailing with my wife during that time, then we had a kid. I took him for a few sails too. But when he got three years old, we put him in school and my wife could not sail with me anymore. So I realised I am missing family. And I got a good opportunity to join as associate professor in the institution. And I liked the job. So I took the job. I was influenced by Captain Subramaniam, who was a very good teacher. Even I wanted to be a good teacher.

Cdt Srikanth: That's all I have to ask sir. Thank you for your time.

Capt. Rajesh: You're welcome.
