MESSAGE FROM THE PRINCIPAL

The Department of Nautical Science at AMET UNIVERSITY was established in 2007 to meet the international demand for certified and educated manpower in the field of Nautical science. This Department offers a bachelor's degree in nautical science. The fundamentals

of shipboard management, navigation, collision avoidance, cargo handling, and a few aspects of maritime technology are taught. Students are encouraged to take on challenging projects and participating extracurricular activities for their overall development. The goal is to develop good trainee Nautical Officer cadets as strong capacity for accepting challenges and shouldering the responsibilities as they arise. We value our industries, Institutions, relationship with alumni, and well-wishers at AMET University.

I applaud the group for taking the initiative to create this magazine. I am pleased to announce that our Nautical Science department is releasing a magazine this academic year. It's a great opportunity for academics to hone their talents. I am convinced that it would be a fantastic means for the rest of the world to learn about AMET's potential and accomplishments. I am hoping that the magazine will bring out everyone's hidden talent. I join others in praising and honoring the editors and magazine together, and wishing them success in their undertaking. It creates a lively environment in which students and faculty members can demonstrate their intellectual ability.

PREAMBLE

Overlooking the deep blue sea cradled by the Bay of Bengal and tucked in the scenic driveway of east coast road is AMET. Only University from India to be a member of the International Association of Maritime Universities. With quality, commitment, knowledge and excellence as its cornerstones, AMET had a humble beginning in the year 1993 with just 14 cadets moulded for a career in merchant navy through a Higher National Diploma programme in marine engineering. AMET's uncompromising strides of excellence in the field of maritime education and training laced with its capacity to feed the global shipping industry with an unrivalled maritime human resource secured it the status of becoming the first Deemed to be University in India for maritime education, training, research and development activities on the 21st August 2007.

AMET had the privilege and unprecedented status of getting unveiled as a Maritime Deemed to be University from the hands of the secretary-general of the International Maritime Organization, Mr. Efthimios E Mitropoulos. AMET serves as an ocean of knowledge for 4000 students pursuing Programs ranging from diploma to Doctoral programs through 9 schools and 23 intensive research and training centers for marine and marine related and Training centers for marine and marine related activities.

Equipped with an excellent infrastructure for research and development, co-curricular and extracurricular activities AMET secured its compliance certificate for ISO 9001:2015 QMS standards from the prestigious and globally renowned DET NORSKE VERITAS, Norway.

Forged with a vision to secure a position of prominence among the world's maritime universities and with a mission to be the fountainhead for nurturing the finest intellectual capital base for the maritime sector - worldwide, education at AMET caters to the comprehensive development of all its students to make them better educated, more articulate and demanding. To that end is enabled and inculcated by modern teaching aids, well-equipped workshops for practical training, a marine workshop for hands-on training on marine auxiliaries, Ship in Campus, well-furnished hostel, canteen facilities, indoor and outdoor games, swimming pool, medical facilities backed by an overall conducive learning environment.

For over two decades AMET is remaining the favourite destination for campus interviews by many shipping giants such as AP MOLLER MAERSK, GOODWOOD, NYK, SONANGOL, VSHIPS,

THOME, SHELL, CHEVRON, STENA and so goes a list of over 100 companies. Besides positions on board, AMET Business School graduates have secured lucrative jobs in commercial shipping sectors such as chartering and shipbroking. Nevertheless, Naval architecture, petroleum engineering, harbour engineering, marine electrical and electronics engineering graduates have successfully walked away from AMET with jobs offering sumptuous packages along with an opportunity to grow and glow in their career swiftly. Needless to say, the entrepreneurship development activities nurtured into AMETians has been found rewarding by students who are Chief Executive Officers of their organization.

AMET works closely and cohesively with the global shipping industry and aligns its objectives regularly to suit the demands of the evolution in technology. Such alignment keeps the students

updated and industry-ready. With a consistent placement record, AMET has been recognized as a premier institution for marine and marine-related jobs and has earned a position as a trustworthy consultant for research and development projects wherein the investment is worth to the tune of several crores of rupees. Adducing to these achievements are the awards and accolades garnered by AMET for a range of activities in pursuit of excellence over the last two decades in maritime education, training, research and development.

AMET commitment to cater to maritime capacity building has no bounds. AMET's stronghold as an institution for quality, discipline and rigour has drawn the attention of several growing maritime nations. To name a few are the 4 Republic of Nigeria, Angola and Djibouti have signed a long-term memorandum of understanding with AMET for developing their nation's maritime human resource in particular and maritime infrastructure in general, Nigerian Maritime safety authority (NIMASA) which is the supreme authority for maritime administration in Nigeria, has got over 500 cadets trained through AMET over the last five years. AMET is a host to over 400 international students hailing from more than 10 countries across the world, thus providing and proving itself as a culturally diverse destination with a pledge to "Respect Diversity" and to promote cross-cultural understanding which is the most essential quality for working in the global environment.

AMET has a very ambitious vision 2025 plan wherein it aims to be a one-stop solution for all marine-related activities happening around the world and has charted out an action plan to gauge its growth towards its 2025 milestone. The dogged perseverance of AMET's

unmatched faculty gears up the student to meet the challenges of their life and career with the tenacity of mind, endeavor to face them and emerge victoriously. With a synergistic attitude prevailing among management, staff and student, AMET is all set to achieve and sustain a status par excellence.

VISION AND MISSION OF THE UNIVERSITY

VISION

To sustain identity as a World Class Leader in Maritime Education and empower learners with wholesome knowledge through progressive innovation in training, research and development which will render students a unique learning experience and a transformation impact on the Global Society

MISSION

AMET will strive continuously to Impart value-based higher education and technical knowledge with uncompromising strides of outstanding quality.

Emerge as a Centre of Excellence inculcating skill development in recent technologies by industrial trends, create World-class research capabilities on par with the finest in the world and broaden student's horizons beyond classroom education.

Nurture talent and entrepreneurship to enable all-round personality development among students.

Empower students across socio-economic strata. Make a positive difference to society through technical education.

QUALITY POLICY

AMET is committed to provide the highest quality in education and be the most preferred institution for pursuing marine and marine related courses.

This will be achieved by a consistent focus on:

- Providing a conducive, vibrant, progressive and enriching learning atmosphere.
- Teaching Excellence and Research Output.
- Global outlook and engaging with the world through learning, ,teaching and research.
- Providing a competitive advantage in gaining employment for further academic opportunities.
- Maintaining excellent links with commerce and industry both national and international.
- Complying with all requirements and continually improving the effectiveness of the Quality Management System.

Merchant Shipping Transport, even in these modern times of technological advancements is the only mode of transport that is still legally, statutorily and customarily given the status of "Maritime Adventure" by all the Maritime Countries. The persons operating the ships amidst the vagaries of the oceans need to be self- governing, motivated and with sharp ability to quickly take the right decisions of considerable commercial and safety implications. The capital value of a single ship along with its cargo is more than the combined capital value of a few Top-end factories including their

full production inventory whereas, in contrast, a ship is manned, operated and managed practically by as little as 20 men whilst more than a few thousand men operate and manage the factories ashore.

The Nautical Science Department under the School of Nautical Science, AMET University was established primarily to develop professionally competent graduate nautical officers with all round proficiency and dedication to the profession for the operation of merchant ships. The course not only provides the students the required theoretical knowledge base but also nurtures in them the innate ability to quickly and readily apply the theory into several challenging application areas that may come about in their later profession.

A career in the Merchant marine as a Nautical Officer can be a rewarding one, both financially and equally importantly in terms of job satisfaction. The required time span, after graduation, to rise to the level of Master will be around 8 years. The course not only prepares the students for the first two stages of their career as Navigating Officer- but the curriculum also provides them with sound knowledge base for higher levels of management as well. There are numerous senior-level shore based job opportunities which await the students if they in their career path choose to switch over from sailing to shore based Shipping sector.

HISTORY AND ESTABLISHMENT

The Department of Nautical Science was one of the two departments established in 1993 offering Higher National Diploma in nautical science in collaboration with Glasgow College of Nautical Science UK. From humble beginning catering to 13 students the department has today grown catering to about 500 BSc students plus about 150 Higher National Diploma Students in the span of last 20 years and offering various Pre-sea and Post Seacourses.

In the early 1990s Maritime Education in India was confined to Training Ship Chanakya and a handful of smaller Institutes offering short-term modular courses, typically of less than 2-weeks duration. More importantly the South Indian sector was a neglected sector with no Maritime education.

Institutes whereas there were considerable number of aspirants into the Merchant Navy profession who had to necessarily go North or West to pursue their core education. AMET, especially the Department of Nautical Science was the first Institution in SOUTH INDIA which ventured into Long term courses.

In the year 2000 the DG Shipping under the Ministry of Shipping and surface transport recognized the need to encourage Private Sector participation in Maritime Education. AMET was the foremost and first PRIVATE Institution to board on this opportunity to commence a 3 year degree program in Nautical Science in collaboration first with Alagappa University and later with BITS Ranchi University.

During these years the Nautical Science Department not only grew in size by way of more students but also gained experience in higher education. AMET sought to become a truly de-novo University under the able aegis of UGC in the year 2007. This transition marked a distinct change in the approach to Maritime Education, primarily the nautical Science. As a dedicated Maritime University the Department of Nautical Science was able to ably meet the changing demands of the stake holding Industry on the one hand and more importantly to progressively raise the pure science aspects of Maritime core subjects to a higher level.

This is borne out by the fact that ever since becoming a De-Novo University the Department has enhanced the syllabus standards more than 4 times in the last 5 years-balancing the areas of pure science and applied science suitably.

ABOUT THE DEPARTMENT

The Department of Nautical Science is one of the two departments established in 1993 offering Higher National Diploma in nautical science - in collaboration with Glasgow College of Nautical Science UK. From A humble beginning catering to 13 students the department has today grown extensively catering to over 900 cadets pursuing 3 year under graduate program in Nautical science approved by the Directorate General of Shipping, Govt. of India as well as cadets pursuing Advance Diploma in Nautical Science approved by the Maritime Coast Guard Agency (MCA), U.K. The strength of the department of nautical science is its faculty and infrastructure. The department is equipped with a team of highly experienced professionals who have a combination of sailing, industry and teaching experience. The department has a full mission ship simulator, Radar and ECDIS simulator, Wheel house, Seamanship laboratory, Container loading simulator and several softwares to provide the cadets hands on experience about ship board operations. AMET University has been awarded consistently with an "A1 Outstanding grade" for the last 8 years which is a testimonial of the department of Nautical science for its consistent performance

VISION

To keep the curriculum updated with the latest international and national requirements to meet the standards for training certification and watch keeping convention as amended

MISSION

To be a source of best practices that will deliver uncompromising technical competency and professional excellence.

To embrace emerging technologies in a seamless manner and integrate it progressively to our curriculum

MESSAGE FROM OUR COURSE INCHARGE

The Department of Nautical Science at AMET UNIVERSITY was established in 2007 to meet the international demand for certified and educated manpower in the field of Nautical science. This Department offers a bachelor's degree in nautical science. The fundamentals

The primary goal of our department is to train successful navigating officers as a 'Seafarer' who can be competent, innovative and productive in addressing the needs of the Shipping Industry, Grow professionally with the knowledge and proficiency skills throughout the career. Acquire a high standard of ethical conduct, safety culture, positive attitude, and societal responsibilities to nurture and develop capable trainee Nautical Officer cadets who have the skills and capacity to accept and shoulder responsibilities when they arise. Our students are actively encouraged to undertake challenging projects and participate in extracurricular activities, fostering holistic development. Our mission is to nurture capable Nautical Officer cadets prepared to handle challenges and responsibilities. At AMET University, we deeply value our partnerships with industries, institutions, alumni, and well-wishers, enriching our educational environment. It is indeed a commendable initiative to introduce a magazine by the Nautical Science department, and it's an exciting opportunity for academics to showcase their talents. This magazine will serve as a platform to showcase AMET's potential and achievements to the world. The hope is that the magazine will uncover the hidden talents of everyone involved. The efforts of the editors and contributors to the magazine are deserving of praise and recognition, and I, along with others, wish them success in this endeavour.

NAVINAUTICS 2K24

Navinautics is one of the most interesting cultural events conducted among the marine Universities by the Department of Nautical Science at AMET University on the 28th february up to 1th of March 2024. Students from the various University participated actively in many events and won many prizes in events that tested their skills based on the seafarers' life. On 1st march the Navinautics 2K24 compendium was released by the honorable Chief Guest "Mr. Rajsekar Daniel" along with the presence of our honorable Principal - DGS Courses "Capt. Gopal Srinivas". The cultural event went like a festival at AMET University and the faculties were also involved in the events. The event was a grand success and mind-blowing. The viewers were very thrilled while watching the energetic performance which gave them goosebumps.

THE EVENTS THAT TOOK PLACE ARE :-

- | | |
|---------------------------|-----------------------|
| ♣ BEST PROJECT | ♣ PST |
| ♣ BUOYANT BRAINS | ♣ TUG OF OARS |
| ♣ BOAT ROWING | ♣ STEERING SIMULATION |
| ♣ CELESTIAL SIGHTS | ♣ WAVE RUSH SHOWDOWN |
| ♣ DEBATE COMPETITION | ♣ WAVES OF TRADITION |
| ♣ PASSAGE PLANNING | ♣ PAPER TRAILS |
| ♣ FIRE FIGHTING | ♣ TREASURE HUNT |
| ♣ SEAMANSHIP SKILLS | ♣ BEST CADET |
| ♣ NAUTICAL DECODER | |
| ♣ SURVIVAL OF THE FITTEST | |

MARITIME NEWS

FIRE NEAR VEHICLE CARRIER BORNHOLM

In early December 2024, a significant fire broke out aboard a vehicle carrier in Danish waters near the island of Bornholm. The fire rapidly escalated, forcing all 19 crew members to abandon the vessel. Rescue operations were conducted efficiently, with all crew members safely evacuated. The incident caused substantial damage to the vessel and underscored the risks posed by the flammable nature of cargo, such as vehicles with batteries or fuel.

- **Challenges:** Vehicle carriers often transport flammable goods, including electric and hybrid vehicles, which can increase fire risks. Proper fire prevention systems and emergency procedures are critical to managing such incidents.
- **Implications:** This incident highlighted the importance of robust fire suppression technology and crew training in fire response.

ENGINE ROOM FIRE IN FLORIDA

Engine Room Fire in Florida

An engine room fire occurred aboard a vessel navigating near the St. John's River in Florida. This incident, though contained without casualties, required extensive firefighting efforts and brought attention to the inherent dangers of machinery failures or fuel leaks in confined engine spaces.

- **Causes:** Engine room fires can arise from fuel system failures, electrical faults, or overheating equipment. Poor maintenance or outdated safety measures often exacerbate these risks.
- **Takeaway:** Regular maintenance and adherence to stringent safety protocols for machinery and electrical systems are essential to mitigate such dangers.

ATTACKS NEAR YEMEN

The waters near Yemen remain one of the world's most perilous maritime regions. In October 2024, two significant attacks occurred:

- Tanker CORDELIA MOON: Attacked 64 nautical miles northwest of Al Hudaydah.
- Bulk Carrier MINOAN COURAGE: Targeted 97 nautical miles northwest of the same region.

These incidents, involving armed groups, exemplify the persistent threat of piracy and politically motivated violence in the area. Such attacks often involve firearms, RPGs, or explosives aimed at intimidating or hijacking vessels.

- Contributing Factors: The ongoing conflict in Yemen has led to a lawless maritime environment, where criminal groups exploit weak enforcement.
- Preventive Measures: Shipping companies navigating the Gulf of Aden and Red Sea regions employ armed security, follow Best Management Practices (BMPs) for protection against piracy, and use secure corridors monitored by international coalitions.

COLLISION AND CAPSIZE IN DAKAR PORT

In October 2024, the vessel Princess Jessica capsized after being struck by the MV Zografia while docked at Dakar Port, Senegal. Fortunately, no casualties were reported. Immediate action by port authorities ensured the area was secured, and salvage operations were initiated to refloat the vessel. The collision did not impact port activities significantly but underscored the challenges of navigating busy port environments

MARITIME LABORATORY

Ship Simulator:

Full mission 360 deg view for Navigation purpose capable of creating a system of actual Ship Navigation during darkness and poor visibility.

Bridge :

A full-fledged bridge and mast located high up with navigation equipment's in working order viz. Radar, GPS, Course Recorder, Echo Sounder, Steering.

Loadicator :

Provides information on the trim and list that the vessel will have in a particular stage of the stowage. Other than trim and list, we also ensure that shear forces and bending moments do not exceed the 25 safe limits

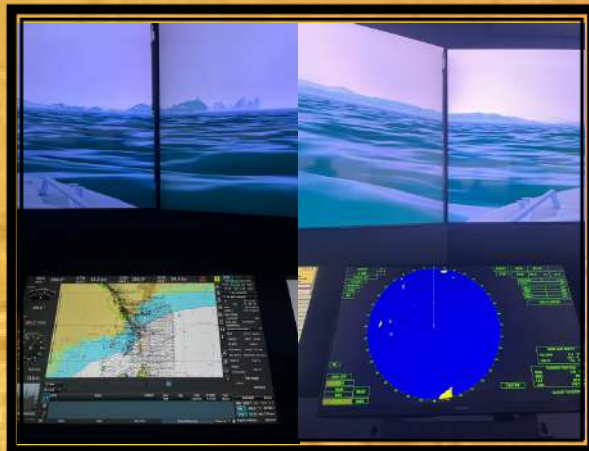

Seamanship Lab:

Fitted with 5000 sq.ft of working laboratory where all facilities available for Rope work, boat work, Steering projects, Rules of Road, seamanship techniques, boat rowing and so on

ECDIS and ARPA Simulator :

It is the complete system for training & understanding the operation of an Electronic Chart And Display And Information System and working of RADAR can be used to demonstrate.

ALUMNI

AIDEN.F.M.FERNANDES DECK CADET SYNERGY GROUP

The time I spent in AMET University has really taught me a lot. I got chance to improve my skills which was very important part of my career.

AMET University's motto is "Steering Quality Education" which completely suits it. It is the best in academics, extra-curricular activities and Faculty Members who keep motivating in every aspect in shaping us into the fine sailors that we are today.

As a hosteller, I would say it is actually a "Home away from Home". The placement record of the AMET has been consistently good over the years. The Placement Department of AMET University along with the Professors gave us excellent training in soft and technical skills. This place has greatly added to my persona. I will always cherish the memories created at this place.

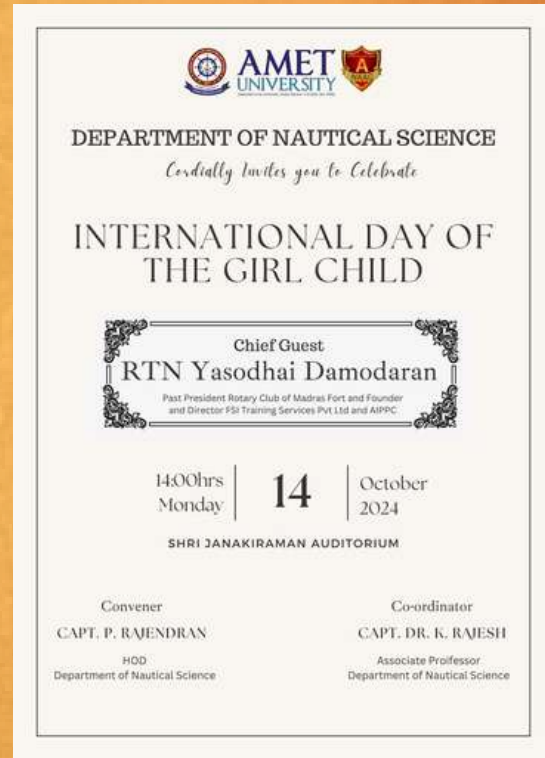

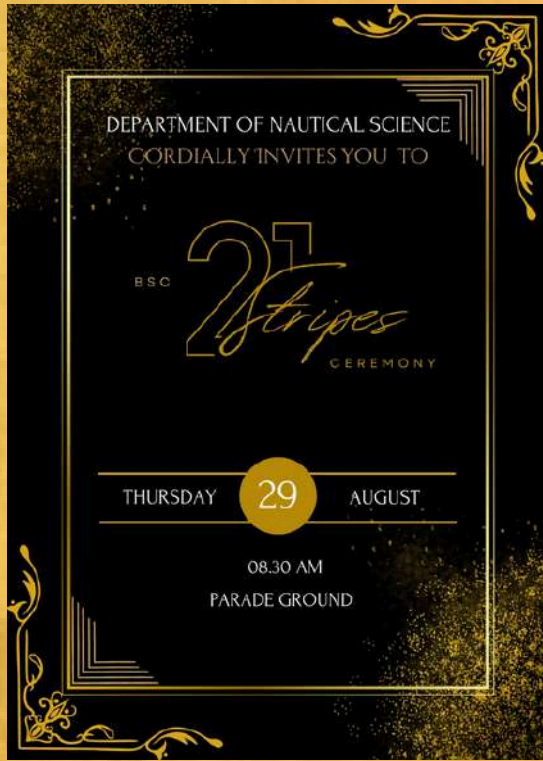

JOVAN D SLIVA
BSC 20
MAERSK

My journey at AMET is one I will cherish forever. The Department of Nautical Science provided me with countless opportunities to grow and excel as an individual. The campus life, the unforgettable bonds I formed, and the dedicated faculty who guided me in starting my career hold a special place in my heart. AMET taught me how to navigate the challenges of the outside world, thanks to the unwavering support of my professors. It equipped me with both theoretical and practical knowledge of the shipping industry, laying a solid foundation for my future.

I am incredibly grateful to AMET's placement cell for guiding me and providing me with the opportunity to secure this placement. Sailing with Maersk has been a transformative experience, teaching me valuable lessons. AMET gave me the confidence to showcase my skills onboard. Life onboard has been amazing, with responsibilities like bridge and cargo watches allowing me to apply both theoretical and practical knowledge. Sailing is truly enjoyable, and I've built strong bonds with my crew. Every day at sea is a learning experience, with senior and junior officers always ready to teach and clarify my doubts. I aspire to become a capable officer one day and sail across the globe.

GLIMPSE OF EVENTS

Cordially invites you to attend the

78th INDEPENDENCE DAY CELEBRATIONS

on Thursday, 15th August 2024 at 09.00 Hrs
at the University Parade Ground

Col. Dr. G. Thiruvassagam
Pro-Chancellor (Academics), AMET University
presides

Dr. Rajesh Ramachandren
Pro-Chancellor, AMET University
*will be the Chief Guest and will hoist the National Flag
and deliver the Independence Day Address*

Mrs. Susheela Ramachandran
Managing Trustee, AMET
will distribute Clothes to the Orphanage

Prof. Dr. V. Rajendran
Vice-Chancellor
Members of the Management
Registrar, Principal
Staff Members and Students

അർമാദം ' 24

Armadham ' 24

You are cordially invited to join us in
celebrating the festival of ONAM, a
time-honored tradition of Kerala.

DATE: 06TH SEP 2024
TIME: 0900HRS ONWARDS
SADHYA (LUNCH): 12PM TO 2PM

POEM

"The Voyage"

The moonlit waves caress the shore,
As vessels ride, forever more.
Their cargo holds, a treasure store,
Bound for distant lands, and seas to explore.

The anchors aweigh, the sails unfurl,
As seafarers chart, their winding whirl.
Through stormy nights, and starry skies,
They brave the deep, with steadfast eyes.

The gulls above, a symphony play,
As ships glide on, through the sun's warm ray.
Their wakes a trail, of foamy white,
As they traverse, the endless blue light.

The ports they visit, a tale to tell,
Of cultures blended, and stories to sell.
The sailors' hearts, a wealth of gold,
Their love for the sea, forever to hold.

The voyage ends, the journey's done,
The ships return, beneath the setting sun.
Their crews weary, but spirits high,
For they've ridden, the waves of the open sky.

"The Ocean's Call"

The waves crash on the rocky shore,
A soothing sound that I adore,
The salty scent, the seaweed's sway,
Beckon me to sail away.

The gulls cry out, their raucous song,
As I set sail, where the horizon's long,
The wind in hair, the sun on face,
I feel alive, in this ocean place.

The creaking wood, the ropes' gentle sway,
As the vessel glides, through the ocean's gray,
The stars above, a twinkling show,
As I navigate, through the waves below.

The ocean's roar, a lullaby sweet,
As I sail on, where the sea meets,
The horizon's curve, a sight to see,
A maritime life, is the life for me.

INTERVIEW WITH CAPTAIN

Capt. R.K. Kumar

Associate Professor

Cdt Sakshi: Good Morning Sir, I'm Cdt Sakshi from 3rd year B.Sc. Nautical Science .I hope you and your family are doing well.

Capt R.K: Thank you Sakshi. Yes, all are doing well.

Cdt Sakshi:What motivated you to pursue a career in the merchant navy and how did you find your way into it?

Capt R.K. Kumar: It was fate, a mix of blessings and challenges. Coming from a Tamil-medium school, I had limited resources but excelled academically. After completing pre-university at Loyola College, I faced difficulties pursuing engineering due to reservation policies.

One day, my brother-in-law came home and suggested merchant navy as a career. Until then, I hadn't even heard of it. He explained that there were no reservations, good salaries, and a clear career path. I was intrigued and looked up an institute, which was TS Rajendra. I had to send ₹100 by money order to get the prospectus and application form. The application deadline was January 31, and I saw the advertisement on January 25. I sent my request immediately, knowing it might not arrive on time.

Coincidentally, my brother-in-law's nephew had also applied for the same program and had mistakenly received two forms. He gave me one form which I submitted just in time. Surprisingly, I passed the entrance exam, though he didn't. Looking back, I'd say fate played a significant role. That was pretty much how I got into it.

Cdt Sakshi: What was the toughest part of your journey, from cadetship to captaincy?

Capt R.K: Honestly, the journey was a beautiful one. Life onboard was never too tough. The real challenges came ashore. During a downturn in the job market, the company I worked for sold its ships, leaving me unemployed. In Mumbai, I stayed at a budget hotel, managing expenses carefully—skipping meals and living frugally while searching for work. Despite the hardships, I ensured my family in Chennai was well taken care of. Those times taught me resilience and financial discipline, lessons which I carry to this day.

Cdt Sakshi: How did you cope with homesickness and other challenges onboard?

Capt R.K. : Homesickness wasn't really a challenge if you accept your situation. Complications arise only when you resist. Acceptance is key.

Cdt Sakshi: Did sailors during your time have alternative sources of income, like sailors today?

Capt R.K.: No, the concept of alternative incomes wasn't prevalent. Back then, it was 12 months of sailing with 2-3 months off, unlike the six months on/off rotations today. However, I always believed in saving a portion of my income—around 15%. This habit builds financial security.

Cdt Sakshi: What career paths can sailors pursue after retiring from the merchant navy?

Capt. R.K. : Ideally, those who wish to work ashore, should switch to shore-based careers between 35-40 years of age to build up experience in such a field.

There are various options:

- Surveying: A rewarding profession for learning, though not very lucrative.
- Technical Superintendent: Involves overseeing ship operations.
- Chartership: Pursuing courses from institutions like the World Maritime University can lead to advanced roles.

The choice depends on individual preferences and circumstances.

Cdt Sakshi: What are the differences between the merchant navy during your time and now?

Capt R.K. : The essence of the job satisfaction remains the same. However, the industry has evolved. In my time, we had longer port stays and more autonomy. Today, there's constant oversight from technical superintendents and others, which can feel restrictive. Additionally, the emphasis on mental well-being has grown, but I feel it sometimes creates problems where none existed. If you keep emphasizing stress and homesickness, people might start feeling them unnecessarily.

Cdt Sakshi: What are your thoughts on AI in the merchant navy?

Capt R.K. : AI and autonomous ships are promising but not yet ready to replace humans entirely. A Human factor plays an important role in ship handling and other important jobs. Challenges like collision avoidance with non-AI-enabled vessels still need solutions. The ongoing research is awaiting their desired results. New regulations have to be amended which can ensure that safety in navigation is maintained. However, it seems far-fetched to be done soon but very possible with the growing technology someday in the future.

Cdt Sakshi: What inspired you to transition to teaching?

Capt. R.K. : Teaching has always been a passion. Even as a surveyor, I taught on weekends. After 14 years as a surveyor and later as a terminal operations manager, I transitioned to teaching full-time. It wasn't a planned move, but I've always believed in giving back to the profession.

Cdt Sakshi: Any advice for aspiring sailors?

Capt. R.K. : Focus on your career and financial discipline. Save consistently. Invest in continuous learning and professional growth. Accept the challenges that come your way, and always aim to do your best.

CROSS WORD PUZZLE

Ocean Life

Across

4. My shell protects my bones and I live for a very long time.
6. I breathe from the hole on my head
9. If you get too close, I could sting you.

10. I'm like an underwater butterfly.
12. I have claws and you can eat me for dinner.

Down

1. I am grey and have big sharp teeth.
2. Some might know me as Nemo.

3. I have 8 tentacles.

5. My skin is velvet smooth.

7. I may be holding a secret treasure.

8. I have 5 arms and if one of them breaks, I can grow it back.

11. I hide in the sand and I have claws.

ACHIEVEMENTS

Cadets of Nautical Science department won the first prize in Yuva Tarang and third prize in IIM innovation awards in the Naval Connection event which was held in Mumbai.

Cadets of Nautical Science department achieved first prize in Independence day Parade

Cadets of nautical science department showcased exceptional talent and sportsmanship at Naughtica 2024 held in pune ,securing multiple laurels across various events:

Mind toss - silver medal

Badminton - Gold medal

Acoustic Band - Gold medal

Nautiskills - Gold medal

Cdt. Sooryanandana M S of nautical science department participated in the prestigious Republic Day Camp 2024 and marched on karthavya path in front of the Prime Minister, President and other officials of India. Became a part of India's 75th Republic Day celebrations in Delhi.
