Salient Research Achievements

a) Marine Pollution, Ecotoxicology and Water Quality Criteria Development Projects

- **Marine Ecotoxicology Studies for developing seawater quality criteria for coral reef ecosystem of Gulf of Mannar (2003-2013)** sanctioned by MoES, New Delhi. Through this project, a National Marine Ecotoxicological Research facility at Pudumadam, in Ramnad District has established and derived seawater quality criteria for metals.
- **Marine Litter in the Coastal and Coral Reef Environment of Gulf of Mannar (2012-2015)** sanctioned by MoEF & CC, New Delhi. The first systematic studies were carried out for monitoring the distribution and occurrences of marine macro and micro litters of selected beaches between Tuticorin and Rameswaram of Gulf of Mannar and selected islands in the Gulf of Mannar.
- **Impact of Ocean Acidification on Calcification of Marine Shellfishes of Gulf of Mannar**, and analyzing the Change taken place over the period of 3 years sanctioned by GOMBRT, Ramanathapuram. Studied survival and growth of shellfish of Gulf of Mannar with sharp variations in pH by CO₂ administration in the seawater media using acute and chronic toxicity testing.

b) Marine Molecular Taxonomy Projects

- **First time in India, a systematic study on Clade, sub-Clade and species level identification of coral endosymbionts of Palk Bay Reefs were done through DBT R & D Research projects.** Currently more than 139 GenBank accession numbers were obtained exclusively using multilocus genotyping (SSU, LSU, ITS, cp23S HV and cp23 & COB) sequences.
- **As first time, the corals of Palk Bay were sequenced and obtained nine GenBank accession numbers using COI genes.**
- This study will open new path, for achieving monitoring and conservation of corals by using Potent Molecular Markers.

c) **Assessed the bio-physical status of corals**

- Studied coral bleaching phenomenon that occurred in global proportions during 1998 and 2002 due to *El-Nino* Southern Oscillation and increase in ambient temperature in the sea affecting coral reefs and associated fisheries causing socioeconomic problems to coastal fishing communities.
- Studied and reported the impact of the tsunami of 26 Dec. 2004 on the 21 islands and corals of Gulf of Mannar and Palk Bay in the southeast coast of India.

d) **Epibiotic Organism Research:**

- Identified more than 130 epibiotic species belonging to 52 families (fauna and marine flora including invasive bryozoan) along the whole Tamil Nadu Coasts at seven zones (natural and artificial coastal defence structures) with one Thesis and four articles.

e) Study on Socioeconomics of marine fishing communities
