AMET UNIVERSITY

INSTITUTIONAL DEVELOPMENT PLAN (IDP) 2025–2030

EXECUTIVE SUMMARY

AMET University's Institutional Development Plan (IDP) 2025–2030 presents a comprehensive roadmap for institutional growth, guided by the mandate of the University Grants Commission (UGC) and aligned with the National Education Policy (NEP) 2020. As the University transitions from a specialized maritime institution to a multidisciplinary university of national and international prominence, the IDP outlines strategic objectives, implementation pathways, and measurable outcomes that will shape AMET's developmental trajectory.

Over the last decade, AMET has consolidated its identity as India's premier maritime university while expanding academic presence into engineering, computing, allied health sciences, commerce, management, and digital education. Significant achievements include hosting the IAMU Annual General Assembly 2025 (a first in India), receiving the Government of India's Sagar Ratna Award 2025 for excellence in maritime education and skill development, and establishing deep industry partnerships with AP Moller Maersk, V Ships, Fleet Management, Kalvi, FACE Prep, NIAT, Emversity, Global Aviation Pvt Ltd, Microsoft, IBM, RedHat, and CII.

The IDP recognises this strong foundation and outlines structured development across nine UGC-mandated components. These include governance reforms, financial sustainability, curriculum strengthening, teaching–learning innovation, faculty development, enhanced research culture, stronger industry and international collaborations, infrastructure modernisation, and digital transformation.

The plan is supported by a robust monitoring mechanism through institutional dashboards, IQAC oversight, Academic and Administrative Audits (AAA), and periodic performance reviews. With clear SMART goals, performance indicators, and risk

mitigation strategies, the IDP provides a credible, outcome-oriented approach to institutional advancement.

SWOC ANALYSIS

Strengths

AMET University's greatest strength lies in its unique identity as a comprehensive maritime university offering a 360-degree coverage of maritime ecosystem disciplines ranging from ship design, construction, operations, navigation, mechanical and electrical systems, logistics, port operations, ocean science, and marine biotechnology, to maritime business and allied engineering domains. This integrated ecosystem is rare among Indian universities. The University's strong industry partnerships ensure exceptional alignment between classroom teaching and real-world industry needs. Strategic collaborations with shipping majors and skill development companies have resulted in consistently high placement rates (including 100% in core maritime programmes). The University's robust research culture, supported by significant funded projects, patents, and a thriving innovation ecosystem (ACIIE), further strengthens its academic standing. AMET's international visibility, highlighted by hosting IAMU AGM 2025, distinguishes it within the global maritime academic community.

Weaknesses

The University's rapid growth has created a need for proportionate expansion of land and physical infrastructure. Certain departments require additional senior faculty with global exposure. The research output, though significant, is concentrated in selected departments and must be broadened. Some administrative processes require further digitisation and integration under a unified ERP environment.

Opportunities

There is significant scope to expand online and distance education for the global maritime and logistics workforce. NEP 2020 provides an enabling environment for multidisciplinary

expansion, academic flexibility, internationalisation, and blended learning. Opportunities exist to collaborate with foreign universities for joint programmes and to establish international offshore centres. The Blue Economy focus of the Government of India offers new funding possibilities for research and training.

Challenges

Growing competition from national and global players in online and maritime education may impact enrolment. Rapid technological changes in maritime operations demand frequent curriculum updates. Regulatory compliance across UGC, DEB, DGS, AICTE, and international bodies must be handled with precision. Coastal vulnerability to climate risks remains a long-term environmental challenge.

COMPONENT 1: GOVERNANCE & LEADERSHIP

AMET University follows a structured governance system supported by statutory bodies such as the Executive Council, Academic Council, Finance Committee, Research Committee, and IQAC. The institution emphasises transparent, participatory governance with well-defined roles and responsibilities across administrative and academic hierarchies.

The leadership prioritises evidence-based decision-making using digital dashboards and ERP systems. AMET's governance vision includes strengthening regulatory compliance, improving academic planning, streamlining administrative procedures, and enhancing stakeholder participation.

Key Governance Initiatives:

- Strengthening decentralised leadership through empowered Deaneries, HoDs, and programme coordinators.
- Expanding policy frameworks for research, consultancy, IPR, faculty development, and internationalisation.

- Enhancing governance transparency through digital workflows, automated approvals, and grievance redressal systems.
- Conducting periodic Academic and Administrative Audits (AAA) to ensure compliance and quality improvement.
- Ensuring preparedness for NAAC next cycle (2026) and continuous NIRF performance enhancement.

COMPONENT 2: FINANCIAL PLANNING & RESOURCE MOBILIZATION

AMET University ensures financial stability by diversifying revenue sources and investing strategically in academic and infrastructure development. The University's financial model combines self-financing programmes, online education revenue, consultancy income, executive education, ACIIE startup revenue, and externally funded research projects.

Key Financial Strategies:

- Scaling online and distance learning to 5,000 learners by 2030 to strengthen recurring revenue.
- Increasing external research funding to ₹15–20 crore with a focus on maritime technology, AI/ML, biotechnology, health sciences, and ocean sustainability.
- Strengthening consultancy services across engineering, logistics, maritime training, curriculum development, and executive programmes.
- Creating alumni endowment funds, CSR partnerships, and international funding linkages.
- Implementing multi-year budgeting for infrastructure expansion, digital systems, and research facilities.
- Ensuring financial risk mitigation through diversified programme portfolios and contingency planning.

COMPONENT 3: ACADEMIC PROGRAMME DEVELOPMENT

AMET is committed to a multidisciplinary, flexible curriculum aligned with NEP 2020. The University offers programmes across maritime, engineering, computing, science, management, commerce, allied health sciences, and aviation domains.

Academic Development Plans:

- Introduction of 8–10 new undergraduate and postgraduate programmes by 2030 in the fields of maritime automation, data science, cyber-physical systems, fintech, renewable energy engineering, marine biotechnology, and health sciences.
- Adoption of flexible credit accumulation through the Academic Bank of Credits (ABC).
- Full alignment with National Credit Framework (NCrF).
- Strengthening vocational education and skill-based modules across programmes.
- Enhancing curriculum internationalization through benchmarking and dual-degree pathways.

COMPONENT 4: TEACHING–LEARNING & ASSESSMENT

AMET's teaching–learning ecosystem integrates Outcome-Based Education (OBE), blended learning, simulation-based training, and experiential learning.

Key Enhancements:

- Strengthening AR/VR-based maritime simulation, digital twin applications, laboratory-based learning, and project-based pedagogy.
- Implementing digital learning tools, LMS analytics, and adaptive learning modules.
- Expanding FDPs on pedagogy, curriculum design, and digital content development.
- Enhancing assessment through rubrics, case-based evaluation, competency mapping, and technology-enabled proctoring.

- Strengthening student support through mentoring, counselling, remedial classes, and career guidance systems.

COMPONENT 5: RESEARCH, INNOVATION & KNOWLEDGE CREATION

AMET aims to establish itself as a research-intensive institution with interdisciplinary strength.

Research Enhancements:

- Creating research clusters in maritime automation, marine ecology, ocean tech, renewable energy, AI, logistics, blockchain, and maritime cyberdefense.
- Expanding Centres of Excellence, including Maritime Simulation, Robotics & Automation, Marine Biotechnology, and AI for Blue Economy.
- Increasing research funding through DST, DBT, Ministry of Shipping, CSR, and international agencies.
- Strengthening IPR management with targets for 150 patents by 2030.
- Scaling ACIIE to 40+ startups, with structured mentoring, incubation, and seed funding.

COMPONENT 6: HUMAN RESOURCE DEVELOPMENT (EXPANDED)

The HR framework focuses on recruitment, continuous professional development, and performance evaluation.

HR Priorities:

- Increasing the proportion of PhD-qualified faculty to 55%.
- Implementing structured faculty development programmes on research, pedagogy, AI tools, and leadership.
- Enhancing performance appraisal systems with clear KRAs tied to teaching, research, and outreach.
- Incentivizing faculty research publications, funded projects, and patents.

- Strengthening administrative staff training in ERP systems, digital workflows, and compliance.

COMPONENT 7: NETWORKING, COLLABORATION & INDUSTRY LINKAGES

AMET's extensive network of industry collaborations deeply integrates real-world expertise with academia.

Key Plans:

- Expanding MoUs to 150 active collaborations.
- Developing international academic partnerships with universities in Europe, Japan, the Middle East, and Southeast Asia.
- Encouraging global faculty exchanges, visiting professorships, and international internships.
- Strengthening industry-linked curriculum delivery with joint courses, co-teaching, and project-based learning.
- Increasing opportunities for apprenticeships, executive training, and industry certification programmes.

COMPONENT 8: PHYSICAL INFRASTRUCTURE & LEARNING RESOURCES

The infrastructure plan emphasises modern academic spaces, enhanced laboratory capacity, green campus initiatives, and technology integration.

Infrastructure Development Plans:

- Constructing three new academic blocks to support multidisciplinary expansion.
- Developing Centres of Excellence with advanced maritime simulators, health sciences labs, and AI/robotics facilities.
- Upgrading hostels to increase capacity by 30% and enhance residential amenities.
- Expanding sports, recreation, and student activity centres.

- Strengthening environmental sustainability through solar energy, waste management, and green landscaping.

COMPONENT 9: DIGITAL INFRASTRUCTURE & ONLINE EDUCATION

AMET aims to become a global hub for digital learning through the Centre for Distance and Online Education (CDOE).

Digital Transformation Initiatives:

- Enhancing LMS capabilities with AI-driven analytics, adaptive learning, and proctored examinations.
- Scaling online degree programmes with high-quality multimedia content.
- Ensuring cybersecurity and data privacy through advanced protocols.
- Integrating ERP systems for academic, administrative, financial, HR, and examination workflows.
- Providing digital literacy training to faculty, staff, and students.

MONITORING & EVALUATION KPIs

AMET will implement a structured monitoring system including:

- Quarterly KPI reviews
- Annual Academic and Administrative Audits (AAA)
- IQAC-driven quality reviews
- Digital dashboard reporting
- Mid-term Vision Review (2027–28)

KPIs include enrolment, placement, OBE attainment, research output, internationalization metrics, financial performance, infrastructure delivery, and student satisfaction.

CONCLUSION & WAY FORWARD

The AMET Institutional Development Plan (2025–2030) provides a comprehensive and forward-looking framework for institutional growth. By integrating maritime strength with multidisciplinary expansion, digital education, research excellence, global partnerships, and community engagement, AMET is poised to emerge as a globally respected university by 2030. The Way Forward includes periodic reviews, stakeholder consultations, adaptive policy updates, and the initiation of Vision 2035 planning towards the end of the current cycle.
